What the Commission of Medical Examiners Has Done and Is Doing.

Physicians, So-Called, Who Will Not Attempt to Pass a Simple Examination.

Two Chinese Medicos Apply for Diplomas-Those Who Have Been Given Certificates.

The medical board worked hard all day yesterday in executive session, and transacted a large amount of business. Over two hundred applications for certificates have already been received. Some of the alleged quacks have failed to put in an appearance and have until the 29th inst. to answer, after which date the district attorney will interview them. A number of surprises are promised regarding those who will be rejected, some of whom stand very high, but have failed to pass an examination. An instance of this kind was one practitioner who appeared for examination yesterday and could not tell how many bones there were in the human leg. The bone's there were in the human leg. The board realizes there will be vigorous protests from the rejected ones. One of the members of the board said yesterday. "It is a duty we owe to the community at large to bar those who trifle with human life. No favoritism is shown; we have prepared an examination which is set down in the law, the questions are not complicated or difficult; any man who pretends to be a physician at all should readily answer them. I would all should readily answer them. I would consider it a crime to grant a man a certifi-cate who cannot answer the questions pro-pounded, and there are some whose educa-tion on the simplest principles of practice are sadiy deficient."

The rejected list is not obtainable at present. The board will first notify those rejected officially, and give them ample opportunity, if they choose, to leave the country before seeing their names in print. It is understood that several have left the territory aiready, knowing they could

ritory already, knowing they could not pass an examination.

The board held a lengthy discussion yesterday morning to decide what percentage would be considered sufficient to justify it in issuing certificates, and decided upon an 80 per cent average. Questions on the following branches are given to each applicant, who retires to a desk and submits the answers in writing: Anatomy, obstetrics, physiology, histology, diseases of women and children, chemistry, diseases of the eye and ear, medical jurisprudence, surgery, materia medica, practice of medicine and nervous diseases. Oral examinations are granted in rare exceptions and then only by a majority vote of the board.

A peculiar case before the board yesterday was the application for certificates by two Chinese physicians, Wong Tuck and Gee Loy, both of Helena. It is said that Chinese physicians secure most of their

Gee Loy, both of Heiena. It is said that Chinese physicians secure most of their practice among white people, and as a rule are quacks. They were informed they would have to undergo examination the same as any one else, but how to get at it is what puzzles the board. The Chinese medicos do not understand the English language well, and unless they can soon learn the medical terms occurring in the questions, they stand a poor chance of questions, they stand a poor chance of being granted certificates.

Among yesterday's applicants was Mrs. Catherine Moran, of Marysville, who applied for a certificate to practice midwifer; she was cited to appear for examination as to her qualifications in this line.

Every physician is not required to undergo the examination when the person's diploma satisfies the board. Another peculiarity of the examination is that it has brought to light numerous colleges of medicine never be-fore heard of. With each of these the secfore heard of. With each of these the secretary will have to correspond to investigate diplomas, as well as some of the old institutions, the validity of certificates credited to which the board may have reason to doubt. Altogether the secretary says he will have to write to nearly 500 colleges, pending replies from which, applications for certificates for those interested will happ fire.

Mrs. Henry Watson, of Butte, bearing a certificate of proficiency from Lying-in hospital, Glasgow, Scotland, appeared and asked permission to practice midwifery, which was granted. Dr. A. H. Sayer, of Billings, passed an xeellent examination, getting an average of 91 per cent.

Those who were granted certificates at yesterday's session were:

Dr. Maria M. Dean, of Helena; John M. Waters, Hozeman; Samuei L. Kelly, Three Forks; John H. Owings, Deer Lodge; Henry Wright Foster, Bozeman; N. J. Salvail, Helena; C. M. Chambliss, Helena; H. D. A man was in the hack and pedestrians could hear him order the woman in a low tone to stop her noise, but she persisted in screaming until her cries were stifled evidently by the woman's male companion placing his hand over her mouth. The hack was followed from Jackson street to Rodney, the pedestrians falling behind, of course, as the hackman was going like mad. It turned into North Kodney and was soon lost to view. Helena Has a Number Who Could be Spared and Should be Suppressed.

With Badges and Spurious Commissions They Attempt Arrests and Levy Blackmail.

There is something peculiarly attractive to the average mind about detective work. The imagination has a great deal to do with things that are very simple. A man to be a good detective must be naturally shrewd, of clever address, persevering, and above all, have good common sense-something the ordinary detective does not possess, for the reason that nature did not kindly provide him with the necessary brains. Then, too, it takes years of training to make a good detective. Perhaps the best men in the world to ferret out crimes are reporters who have had training on city papers. By the work they are required to do they naturally acquire what is called a nose for news, and one who has that is a

Perhaps the fake detective bureaus have more to do with the number of alleged de-tectives now in existence than anything else. They don't have everything to do with it, however, as some appointees of municipal governments are as worthless as those turned out by bureaus.

those turned out by bureaus.

A number of detective bureaus are driving a rushing trade all over the country. The Central Detective bureau, of Topeka, Kan., turns out detectives by the score, and in Montana, especially in Helena, are men going around with big commissions made out on parchment, having a big seal in red and gold in one corner, all of which cost and gold in one corner, all of which cost but \$5. The boss thieves who manufact-ure thief-takers only ask for the money, which pays for the certificate of life mem-bership and a year's subscription to the Detective World, a publication which is a useful paper in its way—to regular of-ficers.
